Description

A proctoscope (rectoscope) is an endoscopic instrument for objective examination of the rectum and distal sigmoid colon. When carrying out sigmoidoscopy using a modern rectoscope, not only a detailed study of the colon mucosa is carried out, but it is also possible to take material for a biopsy and conduct minor medical procedures.

Features of Brightfield Rextoscopes

- The body of the tube and its constituent elements are made of high grade stainless steel
- The endoscope uses elements of optics from a German manufacturer.
- The optical axes are created using the patented lens shaft technology, which ensures the visibility of the entire field of view.
- The cap and sapphire lens are durable and never wear off.
- The valve is made of stainless steel, easy to maintain, protected from damage.
- The connectors are compatible with endoscopic equipment from leading manufacturers, including Storz products.
- Sterilization can take place at low temperatures.

NO.		Field of view	Diameter	Working length
PROC_01		12 degrees	4 mm	175 mm
