### Description

The Dr. Fogg™ Aerosol Generator sprays a solution of hydrogen peroxide with silver ions or peracetic acid (OXIDAG™) down to 5 - 20 µm particles, creating a dry mist that penetrates into hard-to-reach and remote areas of premises, disinfecting all surfaces and air.

### ADVANTAGES OF THE METHOD

- Reducing the impact of human factors on the quality of disinfection
- Simultaneous disinfection of air and surfaces
- Safety and environmental friendliness: decomposes into oxygen and water
- Does not damage the equipment available in the room
- Profitability: low consumption rate of solutions and reduced labor costs
- Speed and ease of use
