Description

0 degrees

Laparoscope is an endoscopic optical system for minimally invasive diagnostic and therapeutic manipulations on the abdominal organs. The medical device for endoscopic laparoscopy is equipped with optical and illumination systems, and some models are equipped with an access channel for surgical instruments. The working diameter of a classic laparoscope is 5 or 10 mm.

Features of Brightfield laparoscopes

- The body of the tube and its constituent elements are made of high grade stainless steel
- The endoscope uses elements of optics from a German manufacturer.
- The optical axes are created using the patented lens shaft technology, which ensures the visibility of the entire field of view.
- The cover and sapphire lens are reliable in operation and never wear out.
- The valve is made of stainless steel, easy to maintain, protected from damage.
- The connectors are compatible with endoscopic equipment from leading manufacturers, including Storz products.
- Sterilization can take place at low temperatures.

Brightfield Laparoscope Optics

No.	Field of view	Diameter	Working length	Remark
LAP_01	0 degree	10 mm	325 mm	
LAP_02	0 degree	10 mm	325 mm	
LAP_05	0 degree	5 mm	290 mm	
LAP_07		11 mm	270 mm	with 6 mm instrument channel
LAP_08		10 mm	275 mm	with 6 mm instrument channel
