Description

Intubation flexible fiberscope is an endoscopic instrument with optical and illumination systems, as well as an access channel for minimally invasive interventions and installation of an incubation tube.

Flexible fiberscope of this modification is designed for intubation of difficult patients, for examination of the upper and lower airways through the endotracheal tube and for minimally invasive interventions by visual control.

Features of the Brightfield Intubation Fiberscope

- The endoscope uses elements of optics from a German manufacturer.
- The optical axes are created using the patented lens shaft technology, which ensures the visibility of the entire field of view.
- Extended clinical applications.
- The connectors are compatible with endoscopic video equipment from leading manufacturers, including Storz products.

Brightfield Intubation Fiberscope Models

NO.	Field of view	Diameter	Working length	Note
BR_FIB_FL_01	Intubation Fiberscope	2.4 mm	600 mm	
BR_FIB_FL_02	Intubation Fiberscope	3 mm	600 mm	instrument channel 1.2 mm
BR_FIB_FL_03	Intubation Fiberscope	4.2 mm	600 mm	instrument channel 1.8 mm
BR_FIB_FL_04	Intubation Fiberscope	5.2 mm	600 mm	instrument channel 2.4 mm
