Description

Wireless convex ultrasound transducers

Wireless convex ultrasound transducers UProbe-2C strives to provide maximum operational freedom while scanning and helps bring a whole new level of ease-of-use, improved efficiencies, and excellent image quality to your workflow.

Application: abdomen, obstetric

Specification:

- Scan mode: electronic array
- Radius: 40 mm
- 64 elements, 8 channel
- Display mode: B, B/M
- Frequency?5.5 MHz
- Depth: 100 – 200 mm
- Measure: distance, area, obstetrics
- Battery last: 3 hours
- Dimension: 156mmx60mmx20mm
- Weight: 308 gram
- Wi-Fi type: 802.11g/20MHz/2.4G
- Work OS: Apple iOS and Android
- Image frame rate: 12f/s
